(54) METHOD FOR SETTING WEB SITE OF TRANSFER WAITING TIME INTERRUPTING FILE

(57)Abstract:

PROBLEM TO BE SOLVED: To eliminate user's waiting time by consisting of a step for preparing a small window in parallel with the reading of a master window based on htm1 information, a step for reading htm 1 information of the small window, a step, etc., for eliminating the small window.

SOLUTION: A master file is down-load-started from a server (S13). At the same time of displaying load processing to be under execution on a screen the browse of a client loads its master file onto a memory or a disk. In parallel with this processing, a slave window is newly opened (S21) to overlap to the picture display to load the master file and data of the small capacity of a small file is loaded onto another memory or disk (S22). Then as soon as completing transfer, the data is displayed from on a desk to a slave window. Thereby, a user can start the reading of contents displayed at the master window of the client computer.
